How does it work?

COZING-C96 delivers state-of-the-art low level laser therapy (LLLT) directly to the scalp and hair follicles to stimulate cell activity and promote blood flow. This direct stimulation of the follicles results in promotion of hair growth.

Real Results:

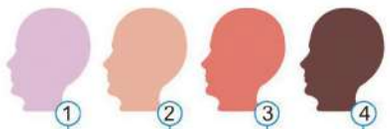

cold laser treatments have been clinically proven to increase blood flow to the scalp and reduce scalp inflammation, both of wnich contribute to hair growth adn overall scalp thelth.

COZING-C96
right for me?

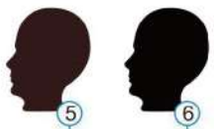

Fitzpatrick skin color scale
Compare your skin tone to the chart below,low level laser therapy has been FDA cleared to promote growth in skin types 1-4.

USB type, auto sensor controlled, 30minutes every time.

It is easy to use, please connect the USB port to the portable power/laptop/any USB port, then wear the cap on the head, the laser will output automatically, 30mins later will off automatically. Furthermore, you can add a golf hat on the laser cap. People can move, work, reading, entertainment, etc. One day one time, 15 days as one course of the treatment, then the interval is 3 days, and last the next course of the treatment.

COZING-C96 is designed to effectively treat skin types 1.2.3.4

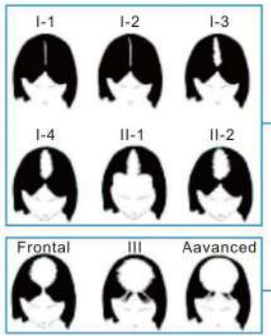

Hair growth in skin tones 5 and 6 has not been documented

CE Proved. Safe. Easy. Affordable

COZING-C96 is an FDA cleared over-the-counter(OTC) device indicated for treatment of Androgenetic Alopecia to promote hair growth in females with female pattern hair loss(FPHL) on the Ludwig and Savin Hair Loss Scale I-II; Fitzpatrick Skin TypesI-Iv.

COZING-C96 is designed to effctively treat hairloss levels:I-1. I-2.I-3.I-4.II-2.II-2

Disclosuer:
Hair growth in levels: frontal,III,Advanced has not been documented

Treatment Time:

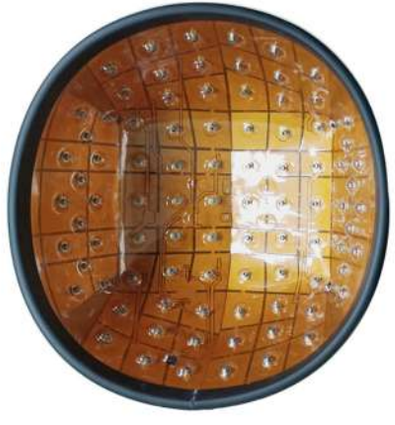

COZING

Laser hair cap use manual

COZING-C96

LASER HAIR GROWTH CAP

The photon energyInjected new vitality to the hair

Laser count:96 | Wavelength:650nm
Operation Temperature:60-95 F,RH 80% |Weight:Less than 8 oz.

Laser hair cap use manual

96 patented laser head, full coverage of scalp, comparable to medical laser hair growth device

Laser hair helmet contains 96 laser irradiation points.The helmet is also rich in silicone feet, can pull the hair, so that the laser reaches directly tothe hair follicle, and achieve the best hair effect. Its coverage is large, and the laser emission wavelength is accurate, which can be comparable to the United States Health clinics widely used, medical laser hair growth device valued of tens of thousands of dollars.

TIPS: When the USB port connects to the electric source successfully, the led indicator on the cap shows the red light with the prompt voice; when the laser output, the led indicator on the cap blinks yellow light.

1.4-18 weeks of oil secretion improved, and hair loss will be back to normal level.

2. 8-26 weeks, hair thicker , more comprehensive (full), more shiny (healthy)

3. 26-52 weeks, the hair comes into the full growth period, and hair volume increased significantly

NASA gene, Silicon Valley technology

Newborn hair core laser technology

It must be the laser.

Only the laser is the relevant light, which is the photon with the consistent frequency, polarization direction and the phase.It is powerful, rich and effective,can penetrate the surface, bsorped by the hair follicle. Non-coherent light can not.

Wavelength 650 nm

650nm laser wavelength is the gold wavelength of germination.It can penetrate the hair follicles, absorped by the hemoglobin in the hair follicles,and stimulate the hair follicles.

Irradiation time:30 minutes

Tissue absorption of laser energy = irradiation power * irradiation time.For the LPT laser power, the appropriate exposure time is critical. 30 minutes is the suitable time to activate the hair follicle.
